

Wind Power Works
conference:

Wind Power for a Low Carbon Economy

Wind power is a key technology in the fight against climate change, and wind farms are already operating in more than 75 countries around the world.

Policy makers, key international organisations and leading wind power companies will address:

- Global drivers for wind power growth
 - Wind power's CO₂ mitigation potential
- Technological innovation
- Wind power and carbon markets

hosted by _____

6 December 2010, 9am – 7.45pm, followed by a reception
Fiesta Americana Coral Beach Hotel | Ave. Kukulcan 234, Cancun, Mexico
